

## **COMPUTER SYSTEMS AND NETWORK TECHNOLOGIES (AAS) PROGRAM STUDENT LEARNING OUTCOMES**

Upon successful completion of the Computer Systems and Network Technologies AAS degree program, the graduate will be able to:

1. Apply critical thinking and problem solving skills required by employers to implement and solve computer systems and networking issues.
2. Demonstrate the knowledge and ability to install, configure and troubleshoot computer systems and networking components.
3. Demonstrate adequate preparation for career employment and/or pursuit of a baccalaureate degree program.
4. Demonstrate knowledge of basic theories, techniques and terminology used in the computer systems and networking environment.
5. Compare and contrast different technologies used to meet users' requirements, create networks and interconnect networks.
6. Utilize and apply the technical, ethical and interpersonal skills needed to function in a cooperative environment.
